

HARSHALI ABHAY KULKARNI

Software Engineer | Python & Django Developer

+91 9172077798 | harshaliak14@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#) | Pune, Maharashtra

PROFESSIONAL SUMMARY

MCA graduate and entry-level Software Engineer with hands-on experience building and deploying full-stack web applications using Python, Django, and Django REST Framework. Proficient in REST API development, MySQL and SQLite database design, token-based authentication and authorization, third-party API integration (Google Gemini AI, Razorpay), Git/GitHub version control, and cloud deployment via PythonAnywhere and Render.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL

Frameworks & Libraries: Django, Django REST Framework, Bootstrap

Backend & Concepts: REST APIs, OOP, CRUD, Authentication & Authorization, Database Design, API Development, Debugging

Databases: MySQL, SQLite

APIs & Integrations: Razorpay, Google Gemini AI, Open-Meteo API

Testing & API Tools: Postman

Tools & Deployment: Git, GitHub, VS Code, PyCharm, PythonAnywhere, Render

PROJECTS

PrepEdge — AI Interview Preparation Platform

Python · Django · MySQL · REST API · Google Gemini AI · Razorpay

- Developed a full-stack interview preparation platform featuring 100+ MCQs, timed quizzes, session management, and token-based authentication using Python and Django.
- Integrated Google Gemini AI API to generate personalized question recommendations driven by user quiz performance; implemented SQL-based reporting for subscription payment analytics.
- Configured Razorpay subscription billing with role-based access control to enforce content restrictions between free and premium users.

ResolveX — Complaint Management System

Python · Django · REST API · Authentication & Authorization

- Built a Django-based complaint management system supporting end-to-end complaint submission, assignment, and resolution workflows.
- Implemented role-based authentication and authorization to control access across user, staff, and admin roles; designed a relational database schema to manage complaint lifecycle states.
- Developed REST API endpoints for complaint creation, status updates, and resolution tracking; deployed the application on PythonAnywhere.

Readio — Online Book Store

Python · Django · Django REST Framework · MySQL · Razorpay · REST API

- Built a full-stack e-commerce platform using Django and MySQL with product catalog management, cart workflows, and order processing.
- Designed and implemented REST APIs with token-based authentication and role-based access control; integrated Razorpay payment gateway for secure checkout.
- Organized backend architecture across modular Django apps (store, orders, accounts) to enforce separation of concerns and maintainability.

Homedo — Household Service Booking System

Python · Django · SQLite · REST API

- Developed a multi-role service-booking application supporting Admin, User, and Service Provider dashboards across 15+ service categories.
- Implemented booking lifecycle management with Django authentication, CRUD operations, and a relational database schema designed for multi-role data access.

EDUCATION

Sinhgad Institute of Management, Pune

Master of Computer Applications (MCA) | 2024–2026 | CGPA: 7.45

SSBES Institute of Technology and Management, Nanded

Bachelor of Computer Applications (BCA) | 2021–2024 | CGPA: 8.76

CERTIFICATIONS

- Python Backend Development — UV Technocrats (2026)
- Python Selenium Automation Testing — SoftGrid Info Pvt. Ltd., Pune (2024)
