Python, JavaScript, PHP, Java, C, C++

Django, Django REST Framework (DRF), HTML5, CSS3, JavaScript, Responsive Design

MySQL, SQL

Git, GitHub, VS Code, PyCharm, IntelliJ IDEA, Jupyter notebook

English, Hindi, Marathi

Problem Solving, Teamwork and Collaboration, Communication Skills, Adaptable

PROJECT

PrepEdge - Interview Preparation Platform

- Built a Django-based interview preparation platform with MCQ tests, quizzes, and performance tracking, supporting **100+ questions**.
- Implemented authentication, session management, and optimized SQL queries.
- Developed personalized recommendations based on user performance.
- Integrated Razorpay payment gateway for secure transactions.

Complaint Management System (Mini Project)

- Built a Django complaint management system for users to submit and admins to manage complaints.
- Implemented role-based authentication with secure access control.
- Implemented full CRUD functionality for complaint handling and management.

Readio - Online Book Store

- Built a Django-based e-commerce project with product listing, cart, and order management.
- Implemented user authentication, role-based access control, and CRUD operations.
- Integrated Razorpay payment gateway and order tracking for secure transactions and designed using Python, Django, HTML, CSS, JavaScript, and SQLite.

Homedo - Household Services Booking System

- Built a role-based service booking platform with separate dashboards for admin, service providers, and users.
- Developed features to schedule, manage, and track **15+ household services** including plumbing and electrical.
- Engineered a scalable system with intuitive, role-based interfaces for seamless user experience.
