

Time	What to do
7:00 AM	Wake up
7:00–7:30	Freshen up + water
7:30–8:00	Breakfast
8:00–10:00	● MH-SET Paper 2 — Main Topic
10:00–10:20	Break
10:20–12:00	● MH-SET PYQs + MCQs
12:00–1:00	Lunch + rest
1:00–2:00	📁 Job applications / interview preparation
2:00–2:30	Break
2:30–4:00	● MH-SET Paper 1
4:00–4:30	Break
4:30–6:00	● Paper 2 — second topic / weak areas
6:00–6:30	Break/snack
6:30–7:15	● C-DAC — C/DSA
7:15–7:30	Get ready for gym
7:30–9:00	🏋️ GYM
9:00–9:30	Travel + shower
9:30–10:00	Dinner
10:00–10:30	● Easy revision / error notebook
10:30–11:00	Relax
11:00 PM	😴 Sleep

timetable — 15 Sept to 24 Oct

PHASE 1: 15–21 SEPT — DBMS + C FOUNDATION
15 Sept — DBMS: Database Fundamentals
Complete in depth:
• DBMS vs file system
• Database architecture
• Three-schema architecture
• Data abstraction
• Data independence
• Database models
• Relational model
• Relation, tuple, attribute, domain
• Super key
• Candidate key

• Primary key
• Foreign key
• Constraints
• Entity integrity
• Referential integrity
• ER model
• Entity
• Attributes
• Relationships
• Cardinality
• Participation constraints
• Weak entity
• ER → relational mapping

Practice: 50–75 PYQs/MCQs
16 Sept — DBMS: Relational Algebra + Relational Calculus
Complete:
• Selection
• Projection
• Union
• Intersection
• Difference
• Cartesian product
• Join
• Natural join
• Theta join
• Outer joins
• Division
• Relational algebra expressions
• Tuple relational calculus
• Domain relational calculus
• Relational algebra vs calculus
Practice: 60+ questions.
17 Sept — DBMS: Functional Dependencies + Normalization
This is HIGH PRIORITY .
Complete:
• Functional dependency
• Trivial/non-trivial FD
• Closure of attribute set
• Armstrong's axioms
• Minimal/canonical cover
• Candidate-key finding
• 1NF
• 2NF
• 3NF
• BCNF
• 4NF
• 5NF
• Lossless decomposition
• Dependency preservation
You should be able to solve normalization questions , not merely define 1NF/2NF/3NF.
18 Sept — DBMS: SQL
Deep study:
• DDL
• DML
• DCL
• TCL
• SELECT
• WHERE
• GROUP BY
• HAVING
• ORDER BY
• DISTINCT

• Aggregate functions
• Nested queries
• Subqueries
• Correlated subqueries
• Joins
• Views
• Indexes
• Constraints
• NULL
• EXISTS
• IN
• ANY
• ALL
• UNION/INTERSECT/MINUS
• SQL query output questions
Practice: At least 50 SQL questions .
19 Sept — DBMS: Transactions
Complete:
• Transaction states
• ACID
• Schedules
• Serial schedules
• Concurrent schedules
• Conflict serializability
• View serializability
• Precedence graph
• Recoverable schedule
• Cascadeless schedule
• Strict schedule
• Locking
• Shared/exclusive locks
• Two-phase locking
• Deadlock
• Timestamp protocol
• Recovery
• Log-based recovery
• Checkpoints
20 Sept — DBMS FULL REVISION
No major new topic.
Do:
150+ DBMS questions
Then make a list:
✗ I don't understand
⚠ I keep making mistakes
✓ I know
21 Sept — DBMS TEST
Take a full DBMS sectional test .
Then spend 2–3 hours analysing it .
This day is extremely important.
22–28 SEPT — DATA STRUCTURES + ALGORITHMS
22 Sept — Complexity + Arrays

Deep:
• Big-O
• Big-Ω
• Big-Θ
• Best/average/worst case
• Time complexity
• Space complexity
• Arrays
• Searching
• Linear search
• Binary search
23 Sept — Linked Lists
Complete:
• Singly linked list
• Doubly linked list
• Circular linked list
• Insertion
• Deletion
• Traversal
• Searching
• Complexity
• Applications
24 Sept — Stack + Queue
Stack:
• Push
• Pop
• Peek
• Applications
• Infix
• Prefix
• Postfix
• Expression conversion
• Expression evaluation
Queue:
• Linear queue
• Circular queue
• Deque
• Priority queue
25 Sept — Trees
HIGH PRIORITY.
Complete:
• Binary tree
• Full binary tree
• Complete binary tree
• Perfect binary tree
• Balanced tree
• Binary Search Tree
• Tree traversal
○ Inorder
○ Preorder
○ Postorder
○ Level order

• BST insertion/deletion/search
• Heap
• Min heap
• Max heap
• Heap sort
26 Sept — Graphs
Complete:
• Graph terminology
• Directed/undirected
• Weighted/unweighted
• Adjacency matrix
• Adjacency list
• BFS
• DFS
• Spanning tree
• Minimum spanning tree
• Prim's
• Kruskal's
• Shortest path
• Dijkstra
• Topological sorting
27 Sept — Sorting
Complete:
• Bubble sort
• Selection sort
• Insertion sort
• Merge sort
• Quick sort
• Heap sort
• Radix sort
• Counting sort
• Stability
• In-place sorting
• Time/space complexities
You should be able to answer:
Which algorithm is fastest here?
and
What is the output after this iteration?
28 Sept — DSA TEST
150+ mixed questions
Then revise mistakes.
 29 SEPT – 5 OCT — OPERATING SYSTEM
29 Sept — Processes
• Process
• Program vs process
• Process states
• PCB
• Context switching
• Threads
• User/kernel threads
• Process vs thread

• IPC
30 Sept — CPU Scheduling
VERY IMPORTANT.
Complete:
• FCFS
• SJF
• SRTF
• Priority
• Round Robin
• Multilevel queue
• Multilevel feedback queue
Practice:
waiting time + turnaround time + response time calculations.
1 Oct — Synchronization
• Critical section
• Race condition
• Mutual exclusion
• Semaphore
• Mutex
• Monitor
• Producer-consumer
• Readers-writers
• Dining philosophers
2 Oct — Deadlocks
You MUST know:
• Mutual exclusion
• Hold and wait
• No preemption
• Circular wait
• Deadlock detection
• Deadlock prevention
• Deadlock avoidance
• Banker's algorithm
• Safe state
• Unsafe state
3 Oct — Memory Management
• Contiguous allocation
• Paging
• Segmentation
• Page table
• TLB
• Virtual memory
• Demand paging
• Page fault
• Page replacement
○ FIFO
○ LRU
○ Optimal
• Thrashing
Practice calculations.

4 Oct — File Systems
• File concepts
• File allocation
• Directory structure
• File protection
• Disk scheduling
• FCFS
• SSTF
• SCAN
• C-SCAN
• LOOK
• C-LOOK
5 Oct — OS TEST
Full sectional test + error analysis.
6–12 OCT — COMPUTER NETWORKS
6 Oct
• OSI model
• TCP/IP model
• Layers
• Protocols
• Encapsulation
7 Oct
• Physical/data-link concepts
• Ethernet
• MAC
• ARP
• Switching
• Error detection
• CRC
8 Oct
• IPv4
• IPv6
• IP addressing
• Subnetting
• CIDR
• Network/host portions
Do numerical questions.
9 Oct
• TCP
• UDP
• Flow control
• Congestion control
• Three-way handshake
• TCP states
10 Oct
• Routing
• Distance vector
• Link state
• RIP
• OSPF
• BGP
• Routing algorithms

11 Oct
Application layer:
• HTTP
• HTTPS
• FTP
• SMTP
• POP
• IMAP
• DNS
• DHCP
• SSH
• Telnet
12 Oct
Full Networks test + revision
 13–17 OCT — COMPUTER ARCHITECTURE + PROGRAMMING
13 Oct — Computer Architecture
Deep:
• Number systems
• Binary
• Octal
• Decimal
• Hexadecimal
• Complements
• Boolean algebra
• Logic gates
• CPU
• ALU
• Control unit
• Registers
• Instruction cycle
• Addressing modes
14 Oct — Memory + I/O
• Cache
• RAM
• ROM
• Main memory
• Secondary memory
• Virtual memory
• Memory hierarchy
• DMA
• Interrupts
• I/O organization
15 Oct — C / Programming
Since C is also important for your C-DAC :
• Variables
• Data types
• Operators
• Control statements
• Functions
• Recursion
• Arrays

• Strings
• Pointers
• Structures
• Unions
• Storage classes
• Dynamic memory allocation
• File handling
• Preprocessor
Output-based questions are compulsory.
16 Oct — Programming Languages + OOP
• Programming paradigms
• Procedural
• Object-oriented
• Functional
• Logic programming
• Compilation vs interpretation
• OOP concepts
• Encapsulation
• Abstraction
• Inheritance
• Polymorphism
• Overloading
• Overriding
17 Oct — Software Engineering
Complete:
• SDLC
• Waterfall
• Spiral
• Agile
• Prototyping
• Requirements
• Functional/non-functional requirements
• SRS
• Cohesion
• Coupling
• Software testing
• Unit testing
• Integration testing
• System testing
• Acceptance testing
• Black-box
• White-box
• Verification vs validation
• Maintenance
18–20 OCT — REMAINING HIGH-VALUE TOPICS
18 Oct — AI
Complete:
• AI fundamentals
• Intelligent agents
• Search
• BFS

• DFS	
• Best-first	
• A*	
• Heuristics	
• Knowledge representation	
• Expert systems	
• Machine learning basics	
• Neural networks	
• Fuzzy logic	
• Genetic algorithms	
• NLP basics	
19 Oct — TOC + Compiler	
TOC:	
• DFA	
• NFA	
• Regular expressions	
• Regular languages	
• CFG	
• PDA	
• Turing machine	
• Chomsky hierarchy	
• Decidability	
Compiler:	
• Lexical analysis	
• Syntax analysis	
• Parsing	
• Semantic analysis	
• Intermediate code	
• Code optimization	

• Code generation
20 Oct — MIXED REVISION
All subjects.
200–250 mixed questions.
21–24 OCT — NO NEW LEARNING
This is where you change completely from:
STUDY MODE → EXAM MODE
21 Oct
Full Paper 2 mock.
Analyse every mistake.
22 Oct
Full Paper 1 + Paper 2.
Analyse.
23 Oct
Weak topics only.
Your error notebook becomes your syllabus.
24 Oct
Very light revision:
• formulas • definitions • algorithms • OS conditions • networking protocols • DBMS normalization • DSA complexities • architecture facts • important PYQs
Sleep properly.
25 Oct
MH-SET

Your daily MCQ rule

For a normal study day:

Main topic: 40–60 questions

Previous topics: 20–30 questions

Paper 1: 30–40 questions

Night revision: 10–20 questions

So approximately:

100–150 questions/day

On mock-test days, considerably more.

26 OCTOBER 2026 → 3 JANUARY 2027

Time	Activity
7:00	Wake up
7:30–8:00	Breakfast
8:00–10:00	● Talathi — Theory
10:00–10:20	Break
10:20–12:00	● Talathi — MCQs/PYQs
12:00–1:00	Lunch + rest
1:00–2:00	📁 Jobs / applications / interview prep
2:00–2:30	Break
2:30–4:30	● UGC NET Computer Science
4:30–5:00	Break
5:00–6:15	● UGC NET PYQs
6:15–7:00	● C-DAC C/DSA
7:00–7:30	Snack + get ready
7:30–9:00	🏋️ Gym
9:00–9:30	Return + shower
9:30–10:00	Dinner
10:00–10:30	● C-DAC/error revision
10:30–11:00	Relax
11:00	Sleep

26 OCT – 8 NOV
TALATHI FOUNDATION
You need to finish the basic syllabus first.
Marathi
Study:
• व्याकरण
• शब्दसिद्धी
• समानार्थी शब्द
• विरुद्धार्थी शब्द
• म्हणी
• वाक्प्रचार
• संधी
• समास
• काळ
• वाक्यप्रचार
• शुद्धलेखन
• वाक्यशुद्धी

• शब्दांचे प्रकार
English
• Parts of speech
• Tenses
• Articles
• Prepositions
• Subject-verb agreement
• Active/passive
• Direct/indirect speech
• Error detection
• Vocabulary
• Synonyms/antonyms
• Sentence correction
• Reading comprehension
Mathematics
Don't try to become excellent at everything.
Start:

1. Number system
2. Simplification
3. Percentage
4. Ratio/proportion
5. Average
6. Profit/loss
7. Simple/compound interest
8. Time & work
9. Time, speed & distance
10. LCM/HCF
Reasoning
1. Series
2. Analogy
3. Classification
4. Coding-decoding
5. Blood relations
6. Direction
7. Ranking
8. Syllogism
9. Venn diagrams
10. Puzzles
 UGC NET — 26 OCT onwards
Don't restart Computer Science from zero.
You've already studied many of these topics for SET.
Start with the topics that are most different / require deeper NET-level preparation.
26 Oct – 1 Nov
Discrete Structures
Complete:
• Propositional logic • Predicate logic • Sets • Relations • Functions • Mathematical induction • Recurrence relations • Graph theory • Trees • Boolean algebra • Combinatorics
This should become one of your strongest areas.
2–8 NOV
Computer Architecture
Complete:
• Number systems • Boolean algebra • Logic gates • Combinational circuits • Sequential circuits • CPU

• Instruction set
• Addressing modes
• Pipelining
• Cache
• Memory hierarchy
• I/O
• Interrupts
• DMA
9–15 NOV
Programming Languages + OOP
Complete:
• Programming paradigms
• C
• C++
• Java basics
• Python concepts
• OOP
• Encapsulation
• Abstraction
• Inheritance
• Polymorphism
• Overloading
• Overriding
• Exception handling
• Runtime/compile-time concepts
This simultaneously helps C-DAC + IBPS SO.
16–22 NOV
DBMS
You've already studied it for SET.
Now go deeper:
• Relational algebra
• FD
• Closure
• Normalization
• SQL
• Transactions
• Serializability
• Recovery
• Indexing
• B/B+ trees
• Query processing
• Distributed databases
23–29 NOV
OS
Go deeper into:
• Process management
• Scheduling calculations
• Synchronization
• Deadlock
• Memory management

• Page replacement
• Virtual memory
• File systems
• Disk scheduling
30 NOV – 6 DEC
DSA + Algorithms
Deep:
• Complexity
• Arrays
• Linked lists
• Stack/queue
• Trees
• BST
• AVL
• Heap
• Graphs
• BFS/DFS
• MST
• Shortest path
• Sorting
• Searching
• Dynamic programming
• Greedy algorithms
• Divide and conquer
This is also very important for C-DAC .
7–13 DEC
TOC + Compiler
TOC:
• DFA/NFA
• Regular expressions
• CFG
• PDA
• Turing machines
• Decidability
• Complexity
Compiler:
• Lexical analysis
• Parsing
• Syntax-directed translation
• Semantic analysis
• Intermediate code
• Optimization
• Code generation
14–20 DEC
Software Engineering + AI
Software Engineering:
• SDLC
• Models
• Requirements
• SRS

• Design
• Cohesion/coupling
• Testing
• Maintenance
• Project management
AI:
• Agents
• Search
• BFS/DFS
• A*
• Knowledge representation
• Expert systems
• ML basics
• Neural networks
• Fuzzy logic
• NLP
21 DEC – 2 JAN
This period becomes Talathi-heavy .
Morning
Talathi full mocks + revision
Afternoon
UGC NET PYQs
Evening
C-DAC
You should NOT be learning huge new Talathi chapters here.
Your goal:
21–25 Dec
Full syllabus revision
26–28 Dec
3 full mocks
29–30 Dec
Weak areas
31 Dec
Mock + analysis
1 Jan
Light revision
2 Jan
Very light revision + rest
3 Jan
TALATHI EXAM
 C-DAC — HOW TO HANDLE IT AFTER SET
This is where I want you to be careful.
Your previous C-DAC diagnostic showed your biggest problems were C, DSA, OS, networking and aptitude .
So:
October
C Programming
November
C + DSA
December

C++ + DSA + OS + Networking
After Talathi
Full C-DAC mode.
 4 JANUARY 2027 ONWARDS
Now Talathi is DONE.
Your timetable changes again.
Priority:
C-DAC ★★★★★
UGC NET ★★★★★
IBPS SO ★★
Jobs ★★
Daily:
8:00–10:30 — C-DAC
11:00–12:30 — C-DAC MCQs
2:30–4:30 — UGC NET
5:00–6:00 — C-DAC mock/analysis
6:00–7:00 — Jobs
7:30–9:00 — Gym
10:00–10:30 — Error revision
C-DAC final preparation
Your order should be:
1. C
2. DSA
3. C++
4. OS
5. Networking
6. Aptitude

7. Computer fundamentals
8. Big Data
9. AI
10. Full C-CAT mocks
And remember the C-CAT scoring:
+3 correct
–1 wrong
0 unattempted
So you'll also need to practice question selection , not just knowledge.
 IBPS SO — when to add it
Don't give it a big block until your C-DAC/Talathi workload comes down.
After Talathi, start:
30–45 minutes/day
Focus on:
• Computer Fundamentals
• OS
• DBMS
• DSA
• C/C++
• OOP
• Networks
• Software Engineering
• Cyber Security
• AI/ML
• Cloud
• Emerging technologies

- For each SET topic, you should reach:
-  **Level 1**
- **What is it?**
-  **Level 2**
- **How does it work?**
-  **Level 3**
- **Why does it work?**
-  **Level 4**
- **When does it NOT work / what are the exceptions?**
-  **Level 5**
- **Can I solve an unfamiliar conceptual question?**
-  **Level 6**
- **Can I distinguish between two very similar options?**
